FIRST CONTRACTOR BREAKER CUSTOMER

Ian Sedgley of Oakleaf Contractors
HM018T hammer with a new JCB 8026

"I can honestly say this small breaker really packs a punch for its size. It does everything asked of it and more. I'm really impressed. Plus, the special launch price was excellent so we ordered a breaker in addition to the machine."

FEATURES & BENEFITS

- Refillable auto greasing system to ensure correct lubrication and improved serviceability on the HM080T and above.
- Auto stop feature on HM080T and above to reduce blank firing and protect unnecessary wear and damage to the breaker from an inexperienced operator.
- Stroke adjusters on HM054T models and above allow the operator to adjust tool speed and stroke length for increased productivity and reduced risk of damage to breaker or carrier.
- Accumulators on the HM026T and above protect the carrier machine from hydraulic pressure spikes, which reduces wear and tear on the machine hydraulics.
- Internal control valves deliver higher efficiency and are least vulnerable compared with competitive products that feature external valves.
