SGrevolution
super cushion solid tyres

Exclusively From
international itws
tyre & wheel solutions ltd

minimum downtime, maximum productivity

SG Revolutions are the perfect tyres for wheeled loading shovels working in tough environments day in day out. Comfortably returning up to 50%, and sometimes more, serviceable tread life than conventional tyres and fill, the unique design of the SG Revolution super cushion solid tyres saves time and money by eliminating downtime from punctures and repairs. At the same time they offer the same comfortable ride as pneumatic tyres and also helps to protect the investment in your machine by absorbing shocks from rough terrain.

Distributed exclusively in Europe by ITWS, the specialists in super cushion tyre technology, the SG revolution tyres are easy to install and there is a wide choice to fit all makes and sizes of machine. Our innovative new Service Exchange programme allows you to swap your old tyres and rims for a set of new tyres and exchange rims for quick and simple installation.
